Maternal and Child Health

A-MCH-1

TABLE A-MCH-1

MISSOURI RESIDENT ABORTIONS
DURING 1979 BY AGE OF MOTHER

Age of Mother	Live Births	Abortions	
		Number	Rate*
Under 15	215	293	1362.8
15-17	4,785	3,002	627.4
18-19	8,229	3,707	450.5
20-24	26,798	7,077	264.1
25-29	22,848	3,751	164.2
30-34	10,040	1,781	177.4
35-39	2,618	844	322.4
40 and Over	516	313	606.6
TOTAL	76,056	20,807	273.6

*Rate is number of abortions per 1,000 live births.

NOTE: Addition of the columns for "live births" and "number" of abortions will yield slightly lower numbers than the totals. This is due to the fact that the age of a small number of women in both categories was unknown.

TABLE A-MCH-2

INFANT MORTALITY BY AGE OF MOTHER: MISSOURI 1979

Age of Mother	Live Births	Infant Death Rate*	
		Number	Rate
Under 18	5,000	127	25.4
18-19	8,229	160	19.4
20-24	26,798	347	12.9
25-29	22,848	236	10.3
30-34	10,040	99	9.9
35-39	2,618	27	10.3
40 and Over	516	11	21.3**
ALL AGES	76,059	1009	13.3

*Rate is deaths per 1,000 live births.

**Rate unstable because it is based on fewer than 20 deaths.

SOURCE: Missouri Center for Health Statistics.

TABLE A-MCH-3

FETAL MORTALITY BY AGE OF MOTHER: MISSOURI 1979

Age of Mother	Live Births	Fetal Deaths*	
		Number	Rate
Under 18	5,000	57	11.4
18-19	8,229	77	9.4
20-24	26,798	210	7.8
25-29	22,848	166	7.3
30-34	10,040	92	9.2
35-39	2,618	66	25.2
40 and Over	516	17	32.9**
ALL AGES	76,059	693	9.1

*Rate is deaths per 1,000 live births.

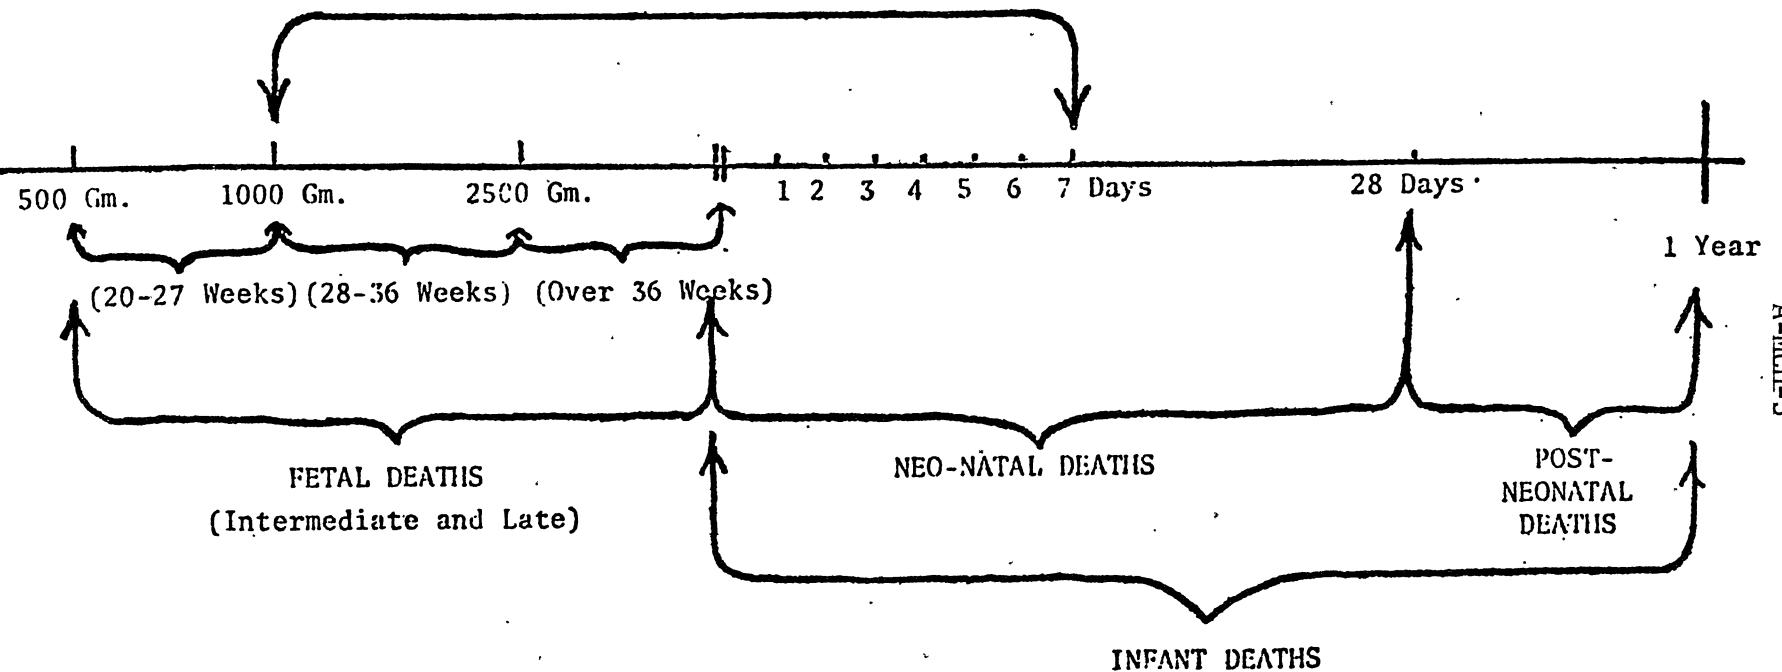

**Rate unstable because it is based on fewer than 20 deaths.

FIGURE A-MCH-1
TIME PERIODS DEFINED FOR MATERNAL AND CHILD HEALTH INDICATORS

PERINATAL PERIOD

(Late Fetal + Early Neonatal)

Perinatal care begins in the last trimester of the pregnancy and is carried over to the first twenty-eight days (also classified as the neonatal period) of the infant's life. A perinatal death is one which occurs between 20th week of gestation and the first 28 days of life. A fetal death occurs between 20 weeks gestation and birth. A neonatal death is one which occurs between birth and the first 28 days of life, and an infant death occurs from birth through the first year.

FIGURE A-MCH-2

LEVEL I, II, AND III FACILITIES

Level I: Facilities providing risk assessment and care for low risk prenatal patients, and those with minor complications. Most of this care can be provided by nurse practitioners and nurse midwives under physician supervision, and should emphasize preparation for child-birth, general health maintenance, nutrition, infant feeding, and parenting skills. Consultation from Levels II and III specialty physicians should be readily available.

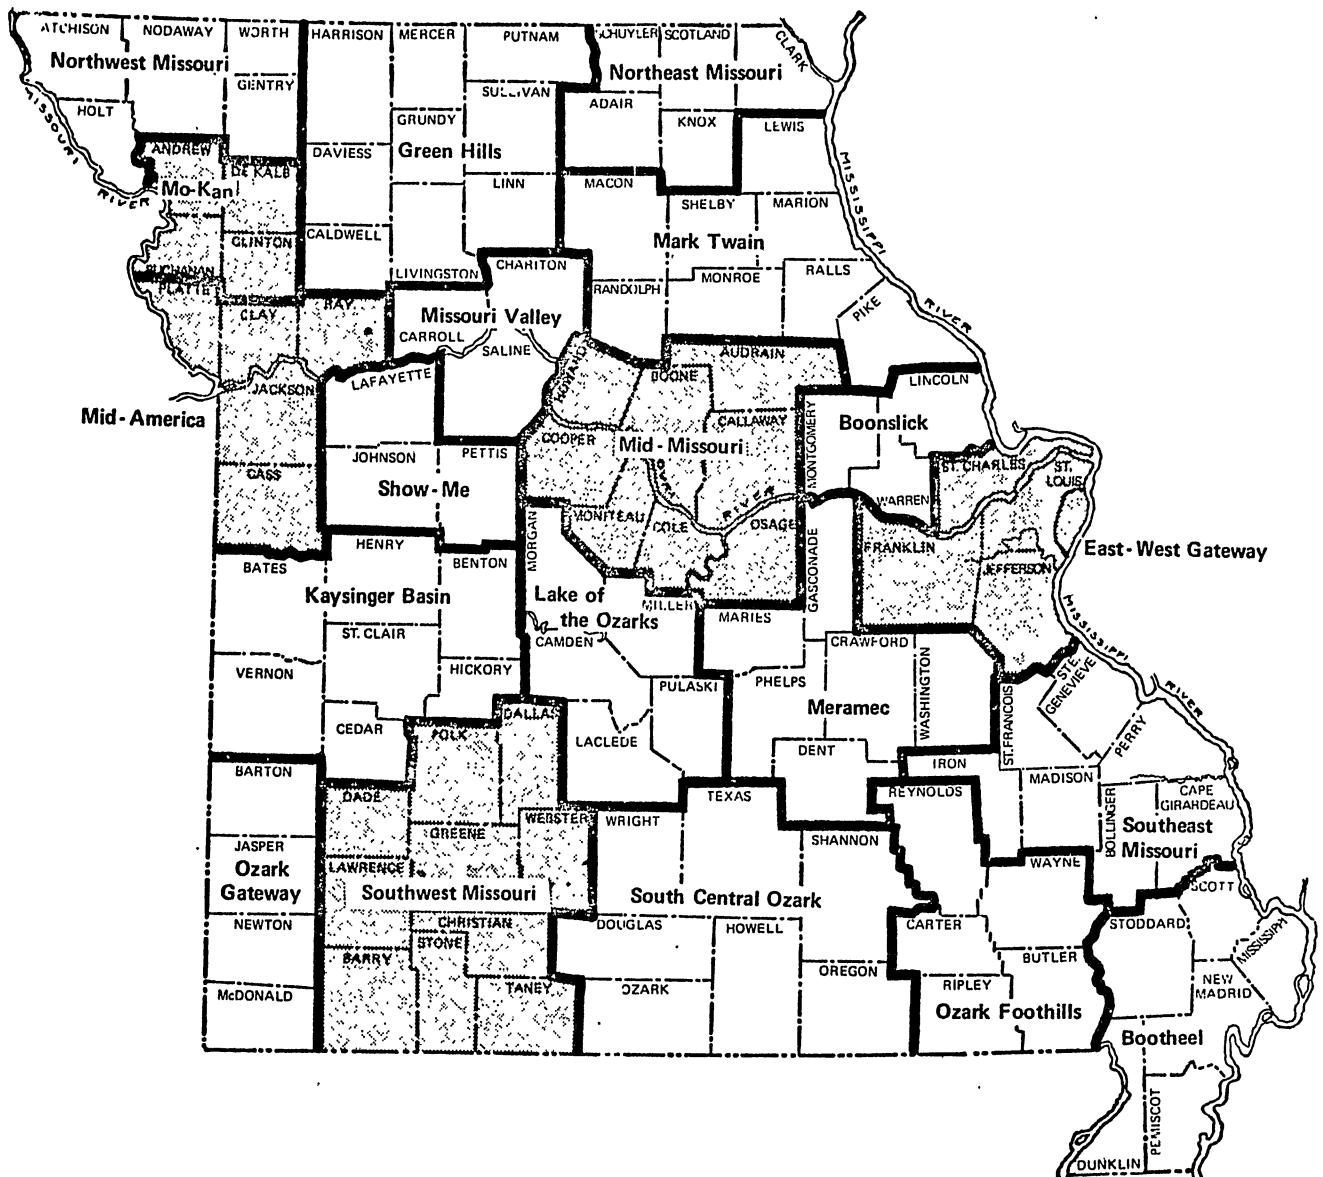

Level II: Facilities providing a full range of prenatal services for uncomplicated patients and for the majority of high risk of complicated patients. Laboratory services to readily assess fetal and maternal well-being should be available, e.g., urinary estriols, photometric analysis of amniotic fluid, lecithin and sphingomyelin ratios, as well as other diagnostic services such as X-ray and ultrasound visualization of the fetus. Patient education as in Level I, and consultation from Level III specialists should be readily available.

Level III: The full range of prenatal care for normal and complicated patients should be provided as described for Level II units, as well as care for unusual or highly complicated cases. In addition, Level III should provide and maintain a highly specialized obstetric and pediatric consultation service with full laboratory facilities for the evaluation of maternal and fetal well-being for all prenatal patients within the region. These consultation services should provide referring physicians' information and advice regarding the further management of the potential or actual high-risk obstetric patient and the high-risk neonate. This medical center should also be involved in providing continuing education, training, and evaluation for all levels of care.

MISSOURI

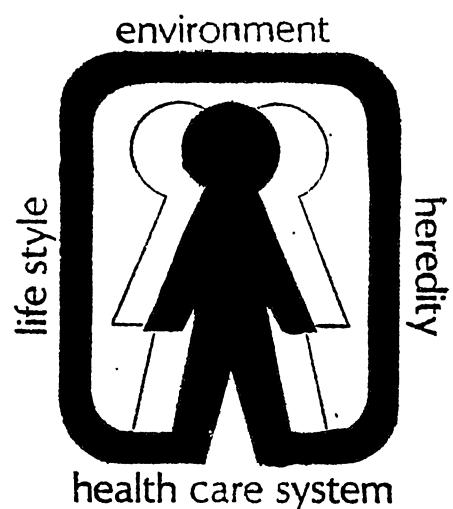

METROPOLITAN REGIONAL
PLANNING COMMISSION AREAS

NON-METROPOLITAN REGIONAL
PLANNING COMMISSION AREAS

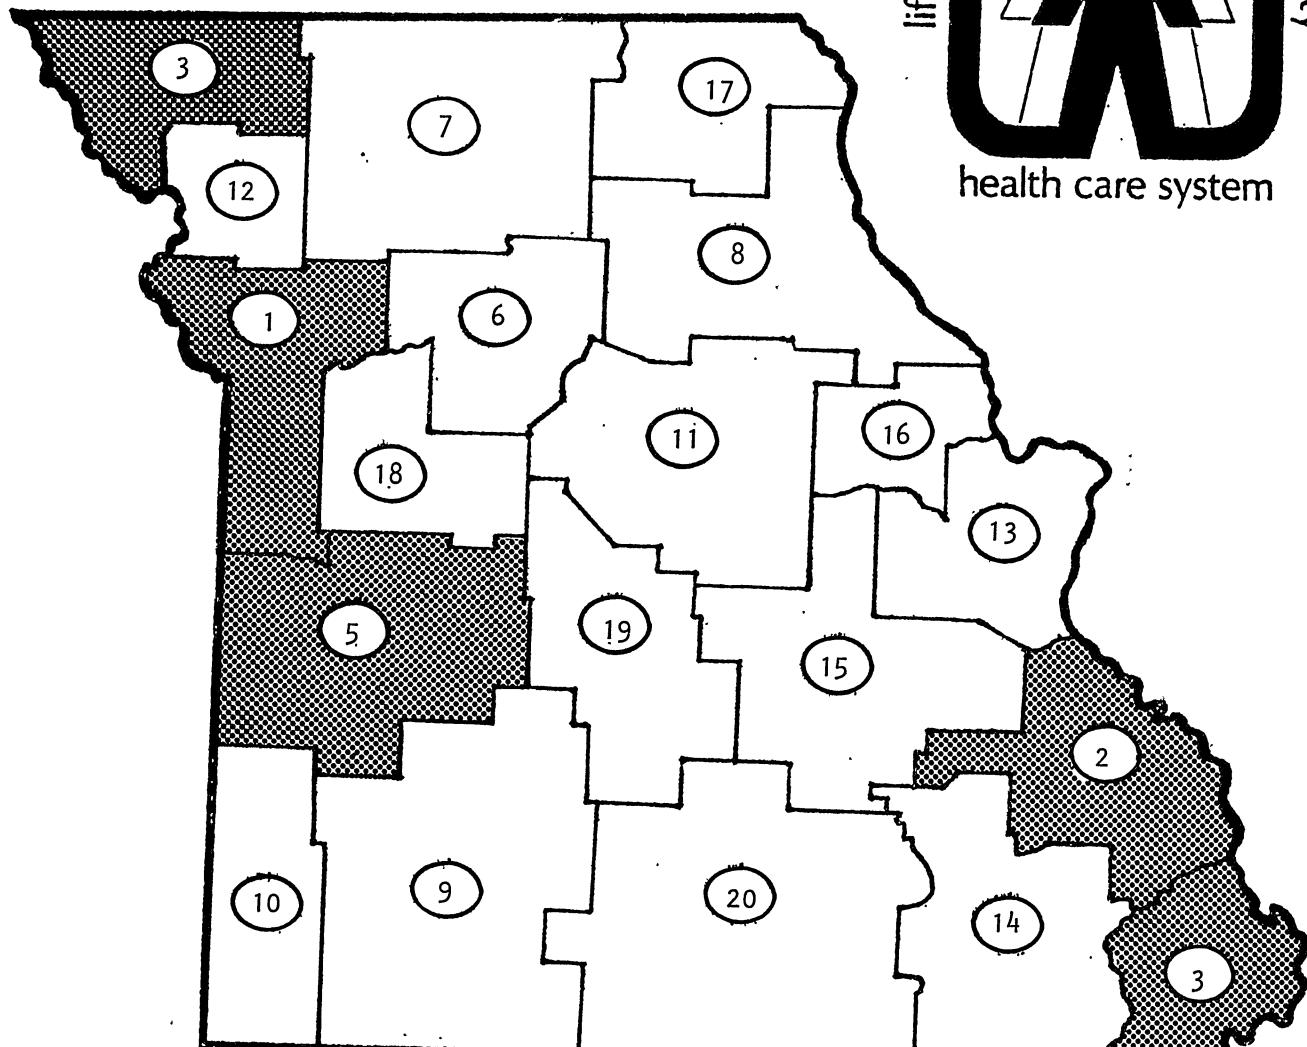

HEALTH AND SOCIO-DEMOGRAPHIC RISK FACTORS

Identified Regional Planning Commission areas are those that fall into the upper quartile for each health and socio-demographic variables for 1978.

Source: Midwest Research Institute

- (1) Premature Birth Rate
- (2) Inadequate Prenatal Care
- (3) Non-white Birth Rate
- (4) Rate of Mothers Under 18
- (5) Rate of Mothers of Less Than High School Education
- (6) Illegitimate Birth Rate

PERINATAL DEATH RATES

Regional Planning Commission areas are rank-ordered by rates for 1978 being highest. Areas designated by shading are those that fall into the upper quartile of the base year.

DENTAL MANPOWER SHORTAGE AREAS

Designated areas are assigned to degree-of-shortage groups, based on the ratio (R) of population to number of full-time-equivalent dentists and the presence or absence of unusually high needs for dental services, or insufficient capacity of existing dental care providers according to the following table:

Source: Federal Register, November 17, 1980, pp. 76003-76005 and August 26, 1980, pp. 57060, 57061.
